Strengthening Interoperable Data Systems for Health Security in Indonesia

Muhammad Azhar, USAID IDDS Indonesia Team Leader; Didit A. Irwanto, USAID IDDS Indonesia Health Informatics Specialist; Margaret A. Rush, USAID IDDS Surveillance Advisor

Context

Emerging infectious diseases are a one health challenge.

Activities

IDDS worked with GOI to shift focus from development of SIZE to national implementation of a Four-way Linking (FWL) data system in Indonesia and to facilitate future transition to a new agency to ensure successful implementation and mainstream the program.

Facilitators

The IDDS Indonesia team overcame several challenges to successfully implement the SIZE system with partners.

Evidence of Impact

For example, the team successfully engaged with GOI and partners in Indonesia to identify the challenges and design a national implementation plan.

Evidence of Impact

Lessons Learned

IDDS worked with a broad range of partners to ensure the success of the program.

Solving Interoperable Data Systems for Health Security in Indonesia

Rebuilding trust in the SIZE development timeline to accommodate transition.

SUCCESSFUL COLLABORATION

Strengthening Interoperable Data Systems for Health Security in Indonesia

The IDDS Indonesia team overcame several challenges to successfully implement the SIZE system with partners.

IDDS and IDDS Information Systems on the current advocate in persuading their replacement to implement the SIZE system.

IDDS has worked with a broad range of partners to ensure the success of the program.

Partnership is powerful.

Nimbility: communications

The IDDS team is led by an Indonesian in-country lead who demonstrates his technical expertise, develops strong relationships, and demonstrates to IDDS and the partners that he knows how to work.

Changing Government Agency Priorities

In February 2019, IDDS worked with the Ministry of the Environment to develop a national One Health framework.

HOLD TRANSITION MEETINGS

When key stakeholders transition to new positions, build the team around them to ensure the project’s momentum isn’t lost.

In July 2020, IDDS conducted the first virtual national governance meeting.

In July 2020, IDDS conducted the first virtual national governance meeting.

IDDS initially planned to host a four-day national workshop in Jakarta to engage all the stakeholders, but the COVID-19 pandemic forced the meeting to be conducted virtually.

A SLOW START IS OK

Sometimes it is better to start a program slowly, especially in a complex environment. Sometimes it is better to start a program slowly, especially in a complex environment.

Final working groups.

Lessons Learned

A SLOW START IS OK
