Title: An effective and sustainable local implementation approach that contributes to Liberia’s health system strengthening efforts -Transforming the University of Liberia, College of Health Sciences (ULCHS)

Shelly A. Wright¹, Karen Koprince¹, Yah Zolia¹, Barbara J. Doe-Quarbo⁴, Morris Womba², Bernice Dahn²

¹USAID/Liberia
²College of Health Sciences, University of Liberia

Context

Describe the context in which the activity takes place. What is the health problem that you are trying to solve? What health system challenges are you facing? What is the challenge that you are trying to address? Why is your activity important?

Activity Description

Provide a detailed description of the activity that you implemented. Include information about the activity’s goals, objectives, and outcomes. Explain how the activity was implemented and what resources were used.

Activity Impact

Discuss the impact of your activity. What were the results of the activity? What changes or improvements were made as a result of the activity? What evidence supports the impact of the activity?

Evidence

Provide evidence to support the impact of your activity. This could include data, statistics, quotes, or other relevant information.

Facilitators

Identify the facilitators that supported your activity. What resources or support did you receive? How did these facilitators help you achieve your goals?

Challenges

Discuss any challenges that you faced during the activity. What were the challenges, and how did you overcome them?

Lessons Learned

Summarize the lessons learned from your activity. What did you learn from the experience? How can this knowledge be applied in the future?

Conclusion

Reflect on the overall impact of your activity. What can be learned from this experience? What recommendations would you make for future activities?

References

List any references or sources that were used in conjunction with the activity.

Appendices

Include any additional information that supports the activity, such as data tables, graphs, or images.
