2024 USAID Health Systems Strengthening

CASE COMPETITION SUBMISSION FORM

Choose **one** theme and answer all sub-questions for your chosen theme. Refer to the scoring criteria as you develop your submission. Please email all questions and completed forms to mpastor@r4d.org. For more information, visit the Accelerator website at www.accelerateHSS.org.

Case Title:		
Contact Name:		
Contact Email:		
Organization:		
Project/Activity Name:		*[Please insert photos, graphics, or charts above (optional). Photos should generally follow tips/guidance offered by USAID. Please submit the original(s) as an attachment with the Submission Form.]*
Authors:		
Project/Activity Country (s):		Insert caption or photo credit here
Geographic location of the organization/project leadership		
Theme: *Please select only one theme*	**Theme 1:** Describe an example of an impactful HSS approach that was successfully institutionalized and/or implemented at scale. **Theme 2:** Describe an example of a specific measurement tool, approach, and/or data source that was used for effective HSS monitoring and evaluation. **Theme 3:** Describe an effective approach to enabling whole-of-society participation and leadership in developing locally-led solutions to improve health system performance and health outcomes.	
Do you want your case to be shared publicly?	**YES**	**NO**

THEME 1:

Describe an example of an impactful HSS approach that was successfully institutionalized and/or implemented at scale. [500-word limit]

- What was the context and problem you sought to address?
- How was this approach implemented?
- What results and impact did you achieve?

What conditions or factors were necessary for institutionalization or scale-up to occur? [500-word limit]

What was learned regarding planning for sustainability and achieving results at scale? [500-word limit]

THEME 2:

Describe an example of a specific measurement tool, approach, and/or data source was used for effective HSS monitoring and evaluation*. [500-word limit]

*Note that the approach or tool could be from the HSS field or beyond.

- What was the context and problem you sought to address?
- How was this approach implemented?
- What results and impact did you achieve?

Did you adapt a global tool, approach, and/or data source for your specific context/program, or did you develop something new for your program? [500-word limit]

How were the tools, approaches, and/or data sources used to understand the interrelationships and interactions between health system components? [500-word limit]

How were the tools, approaches, and/or data sources used to estimate the impact of an HSS intervention on health system-level outcomes and/or health outcomes? [500-word limit]

THEME 3:

Describe an effective approach to enabling whole-of-society participation and leadership in developing locallyled solutions to improve health system performance and health outcomes. [500-word limit]

- What was the context and problem you sought to address?
- How was this approach implemented?
- What results and impact did you achieve?

Which health system actors' viewpoints were elevated? (e.g., private sector, community organizations, local innovators, etc.) [500-word limit]

What were the enabling factors that allowed this approach to be successful? [500-word limit]
